WORK EXPERIENCE

Software Engineer

Sep 2024 – Present

Turing

Remote

- **Software Engineer (July 2025 – Present):** Architected and shipped 10 production microservices on GCP (Cloud Run, GKE, AlloyDB, Pub/Sub, Cloud Tasks) powering an AI agent evaluation platform — including the core evaluation engine, LLM-as-judge scoring service, RAG retrieval pipeline with pgvector, and RL training arena.
- Designed event-driven data pipelines using Pub/Sub (35 topics with DLQs), Cloud Tasks, and Cloud Scheduler to orchestrate 6-phase evaluation workflows with built-in observability, independent retry, and zero silent failures.
- Debugged a production AlloyDB SSL failure affecting 5% of evaluation tasks by tracing a connection pool lifecycle mismatch — reducing failure rate to 0.01%.
- **Pod Lead (Mar 2025 – July 2025):** Led a cross-functional, globally distributed team of 10+ engineers across 3 continents, managing client-facing delivery of GenAI benchmarking and evaluation for APAC stakeholders.
- **LLM Python Developer (Sep 2024 – Mar 2025):** Developed domain-specific large language models (RLHF, prompt engineering, reasoning) for Apple, Meta, and Bytedance; built custom Code Interpreter and evaluation harnesses.

Automation Consultant

Mar 2026 – Apr 2026

OIRRC

Islamabad, Pakistan

- Delivered a technical consulting engagement automating clinical study document generation, reducing cycle time from 3 weeks to under 24 hours — a 95%+ reduction in manual effort.

Software Engineer

Feb 2024 – July 2025

Royal Cyber Inc.

Remote

- Co-developed 'RC AI OPS,' an agentic AI system using Python and LangChain with LLM integration, automating error resolution to improve backend efficiency by 50%.
- Fine-tuned Llama large language models on AWS Bedrock to build domain-specific copilots for financial services clients.
- Architected client-facing GenAI solutions for Fortune 500 clients using MuleSoft, Salesforce, IBM iPaaS and Apache Kafka.

Deep Learning Researcher

Sep 2023 – May 2024

Deep Learning Lab, NCAI

Islamabad, Pakistan

- Authored the award-winning (1st Prize) "OptiGuard" system for glaucoma detection (see Publications below).
- Built machine learning and computer vision systems using PyTorch and Hugging Face, achieving state-of-the-art results in medical imaging.

PUBLICATIONS

OptiGuard: Generalized, Attention-Driven & Explainable Glaucoma Classification

IEEE EMBC 2025

Authors: S.S.U. Shah, M. Huzaifa, **H. Tareen**, M.N. Bajwa

- State-of-the-art deep learning system for glaucoma detection using Retinal Fundus Images with Explainable AI (XAI) for clinical transparency. Robust generalization on SMDG-19 and G1020 datasets.

EDUCATION

National University of Sciences And Technology (NUST)

May 2024

B.Sc. in Computer Science

Islamabad, Pakistan

Majors in Artificial Intelligence & Deep Learning

SKILLS & CERTIFICATIONS

AI & ML: LLMs, RAG, RLHF, Prompt Engineering, Agentic Systems, Fine-tuning, PyTorch, LangChain

Backend & Data: Python, TypeScript, SQL, FastAPI, Next.js, PostgreSQL, AlloyDB, Redis, Microservices

Cloud & DevOps: GCP (Cloud Run, GKE, Pub/Sub, Cloud Tasks), Kubernetes, AWS Bedrock, Docker, CI/CD

Certifications: IBM Cloud Automation Sales, MuleSoft Certified Developer, Microsoft PL-900
